# Introduction

The *Engineers Ireland Salary Survey 2019* presents up-to-date information on the salary levels and employment benefits received by engineers employed in Ireland. The information contained in this report was collected through an online survey of 1,724 members of Engineers Ireland in January 2019. The last Engineers Ireland Salary Survey was conducted using a similar approach during the same period in 2018. The data is collated by Engineers Ireland as an exclusive member benefit to assist engineering professionals and their employers in arriving at equitable decisions in relation to remuneration packages.

In the sections which follow, tables of median salaries are shown for the various engineering career stages and sectors. The median is the number in the middle when a list of numbers is sorted from lowest to highest: half of all engineers earn more than the median salary, half of all engineers earn less than the median salary. The sample sizes on which these medians are based are shown in the Appendix. To ensure accuracy, no median salaries were calculated for categories with very low numbers of survey responses. In each section of the report, boxplots are used to illustrate salary distributions.

#### A boxplot can be interpreted as follows:

Experience is the strongest predictor of salary, therefore the number of years of experience is used to disaggregate salaries in the tables which follow. This number of years' experience is based on the number of years since graduation with the primary engineering qualification. Engineers Ireland awards registered professional titles such as 'Chartered Engineer' and 'Fellow', recognising the competence, continuing professional development and leadership of our members. As well as general trends in salaries and employment benefits, the concluding section of the report reflects on the additional remuneration received by engineers who achieve these titles.

**63%** engineers have their Engineers Ireland subscription fee paid by their employer

# Conclusion

#### Salary trends

Engineers in the first ten years of their career received a 5% pay boost in the past year, worth approximately €2,000. A graduate engineer (1-2 years of experience) now earns €33,750, an increase of 21% over the past five years. While more experienced engineers did not receive the same level of increases, three-quarters reported some pay rise in the last 12 months. Remuneration levels rise more-or-less consistently with experience and most engineers with more than 30 years of experience can expect to earn more than €89,000. Achieving promotion to a more senior position, entering management and supervising more staff for example, will result in a larger salary.

#### Value of professional titles

The value of the professional titles of Chartered Engineer and Fellow is recognised through increased remuneration. A Chartered Engineer can expect to earn approximately €5,000 per year more than an untitled engineer with the same number of years of experience. While the typical untitled engineer with 6-10 years' experience earns €45,000, a Chartered Engineer who graduates in the same year typically earns €50,000. It takes more than 20 years of experience before this salary gap closes. At this point, Chartered Engineers who become Fellows of Engineers Ireland can expect to earn an additional €15,000-20,000 per year.

#### Apply for a professional title today

#### **Pension and benefits**

The vast majority of engineers receive contributions from their employer to their pension, typically 5% of salary and rising with experience. Approximately one-third of engineers with more than 26 years of experience receive pension contributions of more than 10% of salary. 46% of engineers receive an annual bonus and the median value of the bonus is €4,000, though this is strongly related to experience. The majority of survey respondents have their Engineers Ireland subscription paid by their employer (€265 for untitled members). Approximately two-thirds of engineers are entitled to full pay during statutory periods of maternity leave and paternity leave, although this varies according to engineering sector.

# Appendix

The salary survey was conducted online with members of Engineers Ireland between 9-23 January 2019. There were 1,724 responses (after data cleaning) and the table below shows the sample sizes used to calculate each median salary. For example, the median salary of a Chartered Engineer with 6-10 years of experience was calculated based on 103 responses. No median salaries were calculated for categories with very low numbers of responses.

| Experience (years)      | 1-2 | 3-5 | 6-10 | 11-15 | 16-20 | 21-25 | 26-30 | 30+ |
|-------------------------|-----|-----|------|-------|-------|-------|-------|-----|
| All respondents         | 56  | 133 | 350  | 348   | 291   | 221   | 132   | 193 |
| Member (untitled)       | 54  | 126 | 238  | 151   | 109   | 66    | 45    | 45  |
| Chartered Engineer      | 0   | 1   | 103  | 188   | 165   | 133   | 71    | 99  |
| Fellow                  | 0   | 0   | 1    | 2     | 8     | 13    | 13    | 40  |
| Junior engineer         | 43  | 77  | 92   | 22    | 12    | 2     | 1     | 1   |
| Senior engineer         | 1   | 20  | 157  | 161   | 104   | 64    | 43    | 49  |
| Manager                 | 0   | 11  | 40   | 83    | 87    | 69    | 41    | 50  |
| Associate               | 1   | 1   | 6    | 25    | 25    | 15    | 6     | 10  |
| Director                | 0   | 1   | 3    | 12    | 25    | 30    | 27    | 55  |
