**LIST OF ELIGIBLE PROJECT CONSUMABLES AND NON-BASIC MATERIALS  
(INFORMATION FOR APPLICANTS)**

**Project Consumables and Non-basic Materials**

The Green Army will support up to an average value of \$10,000 (GST inclusive) per project for additional materials that are required to deliver the project. These materials are known as Project Consumables and Non-basic Materials. If your application is successful, your Green Army Service Provider will provide the approved Project Consumables and Non-basic Materials to the Green Army Team.

A list of the eligible items is provided below.

For further information about Project Consumables and Non-basic Materials, please refer to Part 4.8 of the Green Army Round Five Project Guidelines.

**Basic materials**

In addition to Project Consumables and Non-basic Materials, Green Army Teams will be provided with certain basic materials. Basic materials include including safety clothing, basic tools (such as shovels, trowels, pruners and other hand held bush regeneration tools) and first aid kits. These basic materials are not included in the list of Project Consumables and Non-basic Materials as they do not need to be requested in your application.

**List of eligible items**

This list has been developed from previous requests for materials and only includes eligible items as embedded in the Round Five Application Form. If the exact item you are seeking is not included, choose the closest matching item and enter the appropriate dollar amount.

- |                              |                      |                                       |
|------------------------------|----------------------|---------------------------------------|
| Additional safety gloves     | Coir logs            | Fibreglass surfacing                  |
| Bait stations                | Concrete             | Flagging tape                         |
| Binoculars                   | Cordless drill       | Flora identification signage          |
| Black plastic sheeting       | Cordless power tools | Food (for residential component only) |
| Blowers                      | Crushed rock         | Fuel and oils for hand tools          |
| Brush cutter                 | Disposal bags        | Gabions                               |
| Bush regeneration tool belts | Drills               | Galvanised strainer posts             |
| Bush regeneration toolkits   | Fence strainer       | Garbage bags                          |
| Chainsaw                     | Fencing equipment    | Generator                             |
| Chemical spray back pack     | Fencing materials    | GPS unit                              |
| Chemical spray unit          | Fencing posts        | Granite sand                          |
| Chemicals – glyphosate       | Fencing tools        | Gravel                                |
|                              | Fertiliser           |                                       |
